Subject Index to Volume 13

A

ABP. *See* Androgen binding protein
Acridine orange fluorescence, sperm nuclei, thiol-disulfide status and (mammals), 342
Acrosin, clinical assay, effect of Triton X-100, 571
Acrosome, loss, phospholipids and, 260
Acrosome reaction
  arachidonic acid metabolism and, 551
  fucoidin and, 519
  in macaque monkeys, activation with caffeine and dibutyryl cAMP, 428
  in noncapacitated sperm, facilitative effect of pulsed addition of dibutyryl cAMP, 398
Actinomycin D, insulin-enhanced methyltrienolone binding to androgen receptors on cultured skin fibroblasts and, 242
Adenosine monophosphate, cyclic (cAMP)
  dibutyryl
    activation of sperm-zona binding (macaque), 428
    pulsed stimulus-induced acrosome reaction in noncapacitated sperm, 398
  generation, SHBG binding to cell membrane and, 101
Adenosine triphosphate (ATP), in sperm, 305
  reactive oxygen species induced depletion, sperm motility and, 379
Adrenogenital syndrome, androstanediol glucuronide levels in, 23
Age/aging, FSH secretion and, 579
Androgen(s). *See also* Dihydrotestosterone; Testosterone
  fetal testicular androgens and development of gubernaculum testis (rat), 534
  plasma levels, changes after kidney transplantation and cyclosporine therapy, 332
  secretion, compensatory response to unilateral castration, LH secretion and (rat), 199
  serum level, sexual behavior, nocturnal penile erections, and mood states and, 297
  in urogenital tract development in male, 465
Androgen binding protein, testicular and epididymal distribution, GnRH-a induced arrest of spermatogenesis and (rat), 153
Androgen receptors, skin fibroblasts, insulin-enhanced methyltrienolone binding to, 242
Androgen-regulated proteins, stage-specific, seminiferous tubule secretion (rat), 172
Andrology laboratory, in assisted reproductive technology, quality control/assurance and methodology, 349
Androstanediol glucuronide, 23
Androstenedione, DHT formation, 23
Antibody(ies), sperm-bound. *See* Antisperm antibodies
Antioxidants
  hypotaurine, in sperm and seminal fluid, 289
  testicular, physiologic development (rat), 450
Antisperm antibodies, detection and quantitation, 55
Arachidonic acid metabolism, acrosome reaction and, 551
Arthritis, adjuvant-induced, testosterone production in (rat), 87
ATP/ADP ratio, in sperm, 305
Axoneme, sperm
  effects of reactive oxygen species, 368, 379
  in hyperactivation, 323

B

B cell(s), bulbourethral gland, 337
Bioassay
  FSH microheterogeneity, 11
  luteinizing hormone, 1
  pituitary gonadotropin release, differential regulation by inhibin and androgens (rat), 526
Blood-brain barrier, cytokines and, 254
Blood-testis barrier, interleukin-1α and (mice), 254
Bulbourethral gland, immune system, 337

C

Caffeine, activation of sperm-zona binding (macaque), 428
Calcium, intracellular free, in programmed cell death of androgen-independent prostate cancer cells, 457
Capacitation
  in acrosome reaction, 398
  hyperactivation and, 323
  sperm surface fibronectin expression after, 28
  sperm surface protein expression after, 488
Carbendazim, testicular and ductal effects (rat), 507
Castration, unilateral, compensatory androgen secretion in, LH secretion and (rat), 199
Catalase, testicular, physiologic development (rat), 450
Cell-cell binding, spermatogenic cell-Sertoli cell adhesion, Sertolic cell plasma membrane polypeptides in (rat), 160
Cell differentiation, testicular, antioxidant enzyme system and reactive oxygen species in (rat), 450
Cervical mucus, bovine, sperm penetration of, correlation with sperm penetration of hyaluronate polymer, 44
Chang, Min Chueh, 587
Cis-platinum, effect on testicular function, fertility, pregnancy outcome, and progeny (rat), 65
Computer modeling, free hormone hypothesis, 107
Computers
  sperm motion analysis. *See also* Sperm motility
    standardization and comparability of instruments, 81
  tracking of germ cells in cycle of seminiferous epithelium, 185
Contraception, male, ketoconazole (rodents), 191
Corticosterone, serum level, ketoconazole and (rodents), 191
Cowper's glands. *See* Bulbourethral gland
Creatine phosphokinase, in sperm, 305
Cryopreservation of sperm
  comparison of cryopreservatives, sources of variability, and prediction of post-thaw survival, 283
  critical osmolality and hydraulic conductivity and its activation energy in fowl and bull sperm, 131
  sublethal cryodamage, lipid peroxidation and loss of superoxide dismutase activity, 232
Cryptorchidism, fetal testicular androgens and development of cranial gonadal suspensory ligaments (rat), 534
Culture studies
  coculture system for evaluation of direct effects of ethane dimethanesulphonate on epididymal function (rat), 409
  human Sertoli cells, lactate, estradiol-17β, and transferrin production, 361
  morphologic differentiation of adult vs. juvenile marmoset Sertoli cells, 560
Cycloheximide, insulin-enhanced methyltrienolone binding to androgen receptors on cultured skin fibroblasts and, 242
Cyclosporine therapy, after renal transplantation, effect on hypothalamic-pituitary-gonadal axis in men, 332
Cytokines
  blood-testis barrier and (mice), 254
  Leydig cell steroidogenesis and (mice), 437
  sperm motility in vitro and, 249

D

dbcAMP. *See* Adenosine monophosphate, cyclic, dibutyryl
DHT. *See* Dihydrotestosterone

Subject Index to Volume 13

A

ABP. *See* Androgen binding protein
Acridine orange fluorescence, sperm nuclei, thiol-disulfide status and (mammals), 342
Acrosin, clinical assay, effect of Triton X-100, 571
Acrosome, loss, phospholipids and, 260
Acrosome reaction
  arachidonic acid metabolism and, 551
  fucoidin and, 519
  in macaque monkeys, activation with caffeine and dibutyryl cAMP, 428
  in noncapacitated sperm, facilitative effect of pulsed addition of dibutyryl cAMP, 398
Actinomycin D, insulin-enhanced methyltrienolone binding to androgen receptors on cultured skin fibroblasts and, 242
Adenosine monophosphate, cyclic (cAMP)
  dibutyryl
    activation of sperm-zona binding (macaque), 428
    pulsed stimulus-induced acrosome reaction in noncapacitated sperm, 398
  generation, SHBG binding to cell membrane and, 101
Adenosine triphosphate (ATP), in sperm, 305
  reactive oxygen species induced depletion, sperm motility and, 379
Adrenogenital syndrome, androstanediol glucuronide levels in, 23
Age/aging, FSH secretion and, 579
Androgen(s). *See also* Dihydrotestosterone; Testosterone
  fetal testicular androgens and development of gubernaculum testis (rat), 534
  plasma levels, changes after kidney transplantation and cyclosporine therapy, 332
  secretion, compensatory response to unilateral castration, LH secretion and (rat), 199
  serum level, sexual behavior, nocturnal penile erections, and mood states and, 297
  in urogenital tract development in male, 465
Androgen binding protein, testicular and epididymal distribution, GnRH-a induced arrest of spermatogenesis and (rat), 153
Androgen receptors, skin fibroblasts, insulin-enhanced methyltrienolone binding to, 242
Androgen-regulated proteins, stage-specific, seminiferous tubule secretion (rat), 172
Andrology laboratory, in assisted reproductive technology, quality control/assurance and methodology, 349
Androstanediol glucuronide, 23
Androstenedione, DHT formation, 23
Antibody(ies), sperm-bound. *See* Antisperm antibodies
Antioxidants
  hypotaurine, in sperm and seminal fluid, 289
  testicular, physiologic development (rat), 450
Antisperm antibodies, detection and quantitation, 55
Arachidonic acid metabolism, acrosome reaction and, 551
Arthritis, adjuvant-induced, testosterone production in (rat), 87
ATP/ADP ratio, in sperm, 305
Axoneme, sperm
  effects of reactive oxygen species, 368, 379
  in hyperactivation, 323

B

B cell(s), bulbourethral gland, 337
Bioassay
  FSH microheterogeneity, 11
  luteinizing hormone, 1
  pituitary gonadotropin release, differential regulation by inhibin and androgens (rat), 526
Blood-brain barrier, cytokines and, 254
Blood-testis barrier, interleukin-1α and (mice), 254
Bulbourethral gland, immune system, 337

C

Caffeine, activation of sperm-zona binding (macaque), 428
Calcium, intracellular free, in programmed cell death of androgen-independent prostate cancer cells, 457
Capacitation
  in acrosome reaction, 398
  hyperactivation and, 323
  sperm surface fibronectin expression after, 28
  sperm surface protein expression after, 488
Carbendazim, testicular and ductal effects (rat), 507
Castration, unilateral, compensatory androgen secretion in, LH secretion and (rat), 199
Catalase, testicular, physiologic development (rat), 450
Cell-cell binding, spermatogenic cell-Sertoli cell adhesion, Sertolic cell plasma membrane polypeptides in (rat), 160
Cell differentiation, testicular, antioxidant enzyme system and reactive oxygen species in (rat), 450
Cervical mucus, bovine, sperm penetration of, correlation with sperm penetration of hyaluronate polymer, 44
Chang, Min Chueh, 587
Cis-platinum, effect on testicular function, fertility, pregnancy outcome, and progeny (rat), 65
Computer modeling, free hormone hypothesis, 107
Computers
  sperm motion analysis. *See also* Sperm motility
    standardization and comparability of instruments, 81
  tracking of germ cells in cycle of seminiferous epithelium, 185
Contraception, male, ketoconazole (rodents), 191
Corticosterone, serum level, ketoconazole and (rodents), 191
Cowper's glands. *See* Bulbourethral gland
Creatine phosphokinase, in sperm, 305
Cryopreservation of sperm
  comparison of cryopreservatives, sources of variability, and prediction of post-thaw survival, 283
  critical osmolality and hydraulic conductivity and its activation energy in fowl and bull sperm, 131
  sublethal cryodamage, lipid peroxidation and loss of superoxide dismutase activity, 232
Cryptorchidism, fetal testicular androgens and development of cranial gonadal suspensory ligaments (rat), 534
Culture studies
  coculture system for evaluation of direct effects of ethane dimethanesulphonate on epididymal function (rat), 409
  human Sertoli cells, lactate, estradiol-17β, and transferrin production, 361
  morphologic differentiation of adult vs. juvenile marmoset Sertoli cells, 560
Cycloheximide, insulin-enhanced methyltrienolone binding to androgen receptors on cultured skin fibroblasts and, 242
Cyclosporine therapy, after renal transplantation, effect on hypothalamic-pituitary-gonadal axis in men, 332
Cytokines
  blood-testis barrier and (mice), 254
  Leydig cell steroidogenesis and (mice), 437
  sperm motility in vitro and, 249

D

dbcAMP. *See* Adenosine monophosphate, cyclic, dibutyryl
DHT. *See* Dihydrotestosterone

Diffusion barriers, in transport models, 107
Dihydrotestosterone (DHT)
  differential regulation in release of bioactive vs. immunoactive gonadotropins from cultured pituitary cells (rat), 526
  peripheral paracrine hormone, 23
Dilauroylphosphatidylcholine, effect on sperm, 260
DNA
  in cultured skin fibroblasts, insulin and, 242
  genomic, fragmentation of, in programmed cell death of prostate cancer cells, 457
Ductules, efferent, occlusion, carbendazim and (rat), 507
Dystrophia myotonica, pituitary-testicular alterations, animal study, 422

E

Electron microscopy
  heterogeneity of Leydig cells with different buoyant densities (mice), 274
  morphologic differentiation of adult vs. juvenile marmoset Sertoli cells in vivo and in vitro, 560
Electron spin resonance, sperm intracellular water volume, 498
Enzyme(s), acrosomal, alterations during epididymal maturation of sperm (rat), 36
Epididymis
  function, direct effects of ethane dimethanesulphonate (rat), 409
  protein secretion, testicular regulation (rodent), 266
  sperm maturation
    biochemical alterations in proacrosin-acrosin system (rat), 36
    direct effects of ethane dimethanesulphonate (rat), 409
Erection, nocturnal, androgen levels and, 297
Estradiol
  plasma levels, changes after kidney transplantation and cyclosporine therapy, 332
  serum level, hyperthyroidism and, 117
Estradiol-17β, Sertoli cell production in vitro, 361
Estrogen(s), plasma levels, changes after kidney transplantation and cyclosporine therapy in men, 332
Estrogen conjugates, plasma levels, seasonality (horse), 214
Ethane dimethanesulfonate, direct effects on epididymal function, coculture study (rat), 409
Extracellular matrix, laminin-coated, morphologic differentiation of adult vs. juvenile marmoset Sertoli cells in vitro, 560

F

Fallopian tube, movement characteristices of hyperactivated sperm obtained from (pig), 75
Fertility/infertility
  antisperm antibodies, 55
  cis-platinum chemotherapy and (rat), 65
  donor insemination with frozen-thawed semen. *See* Cryopreservation of sperm
  dose-response effects of GnRH on plasma gonadotropin and testosterone levels in fertile and subfertile stallions, 543
  ketoconazole and (rodents), 191
  seasonal effects on endocrine-testicular function (horse), 214
  sperm acrosin activity and, 571
  sperm ATP concentration and, 305
  taurine and hypotaurine content of semen, 289
  thiol-disulfide status and acridine orange fluorescence of sperm nuclei (mammals), 342
Fertilization
  biochemical alterations in proacrosin-acrosin system during epididymal maturation of sperm (rat), 36
  sperm surface fibronectin and, 28
Fertilization in vitro. *See* Reproductive technology, assisted
Fibronectin, sperm surface, expression following capacitation, 28, 488
Flow cytometry, antisperm antibodies, 55
Flutamide, modulation of FSH secretion in youg vs. elderly men, 579
Follicle-stimulating hormone (FSH)
  circulating level, in cardiomyopathic hamster, 422
  cyclic Sertolic cell proteins and (rat), 208
  microheterogeneity, 11
  pituitary secretion of bioactive vs. immunoactive form, differential regulation by inhibin and androgens (rat), 526
  plasma levels
  dose-response effects of GnRH (horse), 543
  seasonality (horse), 214
  secretion, in young vs. elderly men, 579
  structure and function, 11
Fourier transform, harmonic analysis of sperm motion, 139
Free hormone hypothesis, 107
Fucoidin, sperm-zona interaction and, 519
Fungicide, carbendazim, testicular and ductal effects (rat), 507

G

Genetics
  oligotriche gene mutation, spermatogenesis and (mice), 312
  programmed cell death, 457
  quaking gene mutation, spermatogenesis and (mice), 312
  strain-related difference in testosterone regulation of Leydig cell 3β-hydroxysteroid dehydrogenase-isomerase activity (mice), 93
Germ cell(s)
  adhesion to Sertoli cells, Sertoli cell plasma membrane polypeptides in (rat), 160
  androgen-regulated proteins (rat), 172
  in cycle of seminiferous epithelium, computer tracking of, 185
  sloughing, carbendazim and (rat), 507
Glutathione peroxidase, testicular, physiologic development (rat), 450
GnRH-a. *See* Gonadotropin-releasing hormone antagonist
Gonadotropin-releasing hormone (GnRH), dose-response effect on plasma gonadotropin and testosterone levels in fertile and subfertile stallions, 543
Gonadotropin-releasing hormone antagonist (GnRH-a), androgen binding protein distribution in testis and epidymis and effect on spermatogenesis (rat), 153
Growth and development
  fetal testicular androgens and development of cranial gonadal suspensory ligaments (rat), 534
  insulin-like growth factor-I and steroidogenesis by pubertal and adult Leydig cells (rat), 125
  mesenchymal-epithelial interactions, urogenital tract in male, 465
  urogenital tract in male, 465
Growth factors, in urogenital tract development in male, 465
Gubernaculum testis, development, fetal testicular androgens and (rat), 534

H

Hamster oocyte penetration test, correlation with sperm penetration of hyaluronate polymer, 44
Harmonic analysis, sperm motion, 139
Hemizona assay
  fucoidin-induced inhibition of sperm-zona binding, 519
  predictive role for fertilization in vitro, 349
Hind-limb unloading. *See* Microgravity
Hirsutism, androstanediol glucuronide levels in, 23

HMG-CoA reductase, mRNA, developmental expression of multiple forms in testis (rat), 318
Hormone(s)
changes after kidney transplantation and cyclosporine therapy, 332
kinetics, free hormone hypothesis, 107
plasma levels, seasonality (horse), 214
transport, free hormone hypothesis, 107
Hyaluronate polymer, sperm penetration of, 44
Hydraulic conductivity, spermatozoa (bull/fowl), 131
Hydrogen peroxide
ATP depletion and sperm motility, 379
effect on sperm motility and sperm axonemes, 368
Hydroxyflutamide, testosterone regulation of Leydig cell 3β-hydroxysteroid dehydrogenase-isomerase activity (mice), 93
Hydroxyl radical, effect on sperm motility and sperm axonemes, 368
3-Hydroxy-3-methylglutaryl coenzyme A reductase. *See* HMG-CoA reductase
Hyperactivation
interdependent modifications at axonemal and cytosolic levels in human sperm, 323
sperm (pig), 75
Hyperthyroidism, testicular function in, 117
Hypotaurine, in sperm and seminal fluid, 289
Hypothalamic-pituitary-gonadal axis, changes after kidney transplantation and cyclosporine therapy, 332

I

Immune system, bulbourethral gland, 337
Immunohistology, bulbourethral gland, 337
Immunometric assay, luteinizing hormone, 1
Infertility. *See* Fertility/infertility
Inhibin, differential regulation in release of bioactive vs. immunoactive gonadotropins from cultured pituitary cells (rat), 526
Insulin, enhancement of methyltrienolone binding to androgen receptors on cultured skin fibroblasts, 242
Insulin-like growth factor-I, effect on Leydig cell steroidogenesis (rat), 125
Interferon-Γ
Leydig cell steroidogenesis and (mice), 437
sperm motility in vitro and, 249
Interleukin-1α
blood-testis barrier and (mice), 254
sperm motility in vitro and, 249
Interleukin-2, murine, Leydig cell steroidogenesis and (mice), 437

K

Keratinocyte growth factor, in urogenital tract development in male, 465
Ketoconazole, endocrine and reproductive effects (rodent), 191
Kidney transplantation, hormonal changes after, 332

L

Lactate, Sertoli cell production in vitro, 361
Laminin, sperm surface, expression following capacitation, 488
Leydig cell(s)
heterogeneity of Leydig cells with different buoyant densities (mice), 274
3β-hydroxysteroid dehydrogenase-isomerase activity, testosterone regulation of (mice), 93
proliferation and differentiation, testicular mast cell proliferation and differentiation and (rat), 387
steroidogenesis
in arthritis (rat), 87
cytokines and (mice), 437
insulin-like growth factor-I and (rat), 125
Light microscopy
heterogeneity of Leydig cells with different buoyant densities (mice), 274
morphologic differentiation of adult vs. juvenile marmoset Sertoli cells in vivo and in vitro, 560
Lipid peroxidation, in sublethal cryodamage to sperm, 232
LNCaP cell line, SHBG binding to cell membrane and second messenger generation, 101
Luteinizing hormone (LH)
bioactive, immunoassay for, 1
circulating level, in cardiomyopathic hamster, 422
pituitary secretion of bioactive vs. immunoactive form, differential regulation by inhibin and androgens (rat), 526
plasma levels
dose-response effects of GnRH (horse), 543
seasonality (horse), 214
secretion, in compensatory androgen response to unilateral castration (rat), 199
serum level, hyperthyroidism and, 117
Luteinizing hormone receptor, in cardiomyopathic hamster, 422

M

α_2-Macroglobulin, Sertoli cell production, basal and FSH-stimulated steady state levels (rat), 208
Macrophage(s), in regulation of testicular steroidogenesis in arthritis (rat), 87
Mast cells, proliferation and differentiation in testis, Leydig cell proliferation and differentiation and (rat), 387
Mesenchymal-epithelial interactions, urogenital development in male, 465
Methyltrienolone (R1881), insulin-enhanced binding to androgen receptors on cultured skin fibroblasts, 242
Microgravity
sperm motility and (bull), 433
testicular function during caudal elevation (rat), 224
Modelling, computer tracking of germ cells in cycle of seminiferous epithelium, 185
Monoclonal antibody studies, immunohistologic characterization of bulbourethral gland, 337
Mood states, androgen levels and, 297
mRNA, HMG-CoA reductase, developmental expression of multiple forms in testis (rat), 318
Multiple regression analysis, sperm penetration of hyaluronate polymer and functional competence, 44

O

Oligotriche gene mutation, spermatogenesis and (mice), 312

P

Paracrine, regulation of prostate growth, role of nerve growth factor-like protein in, 476
Peritubular cells, androgen-regulated proteins (rat), 172
Phospholipids, effect on sperm, 260
Pituitary-testis axis, in cardiomyopathic hamster, 422
Polyamines, in ejaculated sperm, sperm motility and (ram), 293

Potassium chromium oxalate, in electron spin resonance measurement of sperm volume, toxicity to sperm, 498
Pregnancy outcome, cis-platinum chemotherapy in male and (rat), 65
Proacrosin-acrosin system, alterations during epididymal maturation of sperm (rat), 36
Progeny, cis-platinum chemotherapy in father and (rat), 65
Programmed cell death, in prostate cancer, 457
Prolactin
  circulating level, in cardiomyopathic hamster, 422
  plasma levels, changes after kidney transplantation and cyclosporine therapy, 332
Prostate
  development, mesenchymal-epithelial interactions, 465
  growth, role of nerve growth factor-like protein in paracrine regulation of, 476
  SHBG binding to cell membrane and second messenger generation, 101
Prostate cancer
  mesenchymal-epithelial interactions, 465
  programmed cell death, 457
Protamines, sperm nucleus, 342
Protein(s)
  epididymal secretion, testicular regulation (rodent), 266
  Sertoli cell (rat), 208
  androgen-regulated, 172
Pseudohermaphroditism, androstanediol glucuronide levels in, 23
Putrescine. *See* Polyamines

Q

Quaking gene mutation, spermatogenesis and (mice), 312
Quality control/assurance
  in andrology laboratory, 349
  computer-aided sperm analysis, 81

R

R1881. *See* Methyltrienolone
Radioimmunoassay
  cyclic Sertolic cell proteins (rat), 208
  FSH microheterogeneity, 11
  pituitary gonadotropin release, differential regulation by inhibin and androgens (rat), 526
Radioligand receptor assay, FSH microheterogeneity, 11
Reactive oxygen species
  ATP depletion and sperm motility, 379
  effect on sperm motility and sperm axonemes, 368
  testicular, physiologic development (rat), 450
Reproductive technology, assisted, andrology laboratory in, quality control/assurance and methodology, 349

S

Scanning laser cytometry, Sertoli cell plasma membrane polypeptides in spermatogenic cell-Sertoli cell adhesion (rat), 160
Semen, taurine and hypotaurine content, 289
Semen analysis, computer-aided
  harmonic analysis of sperm motion, 139
  standardization and comparability of instruments, 81
Semen quality, seasonality (horse), 214
Seminal vesicle, mesenchymal-epithelial interactions, 465
Seminiferous tubules
  cyclic Sertolic cell proteins (rat), 208
  secretion of stage-specific, androgen-regulated proteins, 172
Sertoli cell(s)
  ABP production and distribution, spermatogenesis and (rat), 153
  androgen-regulated proteins (rat), 172
  blood-testis barrier, interleukin-1α and (mice), 254
  lactate, estradiol-17β, and transferrin production in vitro, 361
  plasma membrane polypeptides in spermatogenic cell-Sertoli cell adhesion (rat), 160
  protein products (rat), 208
  ultrastructure, adult vs. juvenile marmoset Sertoli cells in vivo and in vitro, 560
Sex hormone-binding globulin (SHBG)
  cell membrane binding and second messenger generation, 101
  serum level, hyperthyroidism and, 117
Sexual behavior, androgen levels and, 297
Signal transduction, in acrosome reaction, 398
Somatomedin-C. *See* Insulin-like growth factor-I
Spermatogenesis
  caudal elevation and (rat), 224
  computer tracking of germ cells in cycle of seminiferous epithelium, 185
  genetic mutations and (mice), 312
  GnRH-a induced arrest, ABP distribution in testis and epididymis and (rat), 153
  testosterone and, androgen-regulated proteins (rat), 172
Spermatozoa
  acrosin activity, clinical assay, effect of Triton X-100, 571
  acrosomal loss, phospholipids and, 260
  activation after mating in rat and hamster, 444
  adenosine triphosphate concentrations, ATP/ADP ratio, and creatine phosphokinase activity, 305
  antibody to. *See* Antisperm antibodies
  axoneme. *See* Axoneme
  capacitated
    fibronectin expression, 28
    laminin expression on sperm tail, 488
    vitronectin expression on sperm head, 488
  critical osmolality and hydraulic conductivity and its activation energy (bull/fowl), 131
  cryopreserved. *See* Cryopreservation of sperm
  demembranated, effect of reactive oxygen species on axoneme, 368
  demembranated-reactivated, model for studying hyperactivation, 323
  ejaculated, polyamines in, motility and (ram), 293
  epididymal maturation
    biochemical alterations in proacrosin-acrosin system (rat), 36
    direct effects of ethane dimethanesulphonate (rat), 409
  intracellular water volume, measurement by electron spin resonance, 498
  maturation, thiol-disulfide status and acridine orange fluorescence of sperm nuclei (mammals), 342
  motion. *See* Sperm motility
  movement characteristics, correlation with sperm penetration of hyaluronate polymer, 44
  noncapacitated, pulsed stimulus-induced acrosome reaction, 398
  proacrosin-acrosin system, maturation-associated changes (rat), 36
  taurine and hypotaurine content, 289
Sperm count, cis-platinum chemotherapy and (rat), 65
Sperm function tests
  quality control/assurance in andrology laboratory, 349
  sperm penetration into hyaluronate polymer and functional competence, 44
Spermidine. *See* Polyamines
Spermine. *See* Polyamines
Sperm motility
  cis-platinum chemotherapy and (rat), 65
  computer-aided analysis
    fucoidin and, 519

harmonic analysis, 139
standardization and comparability of instruments, 81
effects of reactive oxygen species, 368
ATP depletion and, 379
effects of tumor necrosis factor-α, interleukin-1α, and interferon-Γ in vitro, 249
epididymal effects of ethane dimethanesulphonate and (rat), 409
hyperactivated
interdependent modifications at axonemal and cytosolic levels, 323
movement characteristics (pig), 75
hyperthyroidism and, 117
initiation after mating in rat and hamster, 444
ketoconazole and (rodents), 191
microgravity and (bull), 433
movement characteristics, correlation with sperm penetration of hyaluronate polymer, 44
polyamines and (ram), 293
post-thaw sperm, comparison of cryopreservatives, sources of variability, and prediction of post-thaw survival, 283
Sperm-oolemmal interaction
sperm surface fibronectin and, 28
sperm surface proteins and, 488
Sperm penetration assay
predictive role for fertilization in vitro, 349
sperm penetration into hyaluronate polymer, 44
Sperm-zona binding
fucoidin and, 519
in macaque monkeys, activation with caffeine and dibutyryl cAMP, 428
predictive role for fertilization in vitro, 349
Stereology, heterogeneity of Leydig cells with different buoyant densities (mice), 274
Steroidogenesis
Leydig cell
in arthritis (rat), 87
cytokines and (mice), 437
insulin-like growth factor-I and (rat), 125
testicular
caudal elevation and (rat), 224
genetic mutations and (mice), 312
testosterone regulation of Leydig cell 3β-hydroxysteroid dehydrogenase-isomerase activity (mice), 93
Sulfated glycoprotein-2 (SGP-2), Sertoli cell production, basal and FSH-stimulated steady state levels (rat), 208
Superoxide anion
ATP depletion and sperm motility, 379
effect on sperm motility and sperm axonemes, 368
Superoxide dismutase activity
in cryopreservation of sperm, 232
testicular, physiologic development (rat), 450

T

Tamoxifen, modulation of FSH secretion in youg vs. elderly men, 579
Taurine, in sperm and seminal fluid, 289
T cell(s), bulbourethral gland, 337
Tempone, in electron spin resonance measurement of sperm volume, toxicity to sperm, 498
Testibumin, Sertoli cell production, basal and FSH-stimulated steady state levels (rat), 208
Testis
antioxidant enzyme system, physiologic development (rat), 450
atrophy, carbendazim and (rat), 507
computer tracking of germ cells in cycle of seminiferous epithelium, 185
cyclic Sertolic cell proteins (rat), 208
descent, fetal testicular androgens and development of cranial gonadal suspensory ligaments (rat), 534
developmental expression of multiple forms of HMG-CoA reductase mRNA (rat), 318
function
in cardiomyopathic hamster, 422
caudal elevation and (rat), 224
cis-platinum chemotherapy and (rat), 65
heterogeneity of Leydig cells with different buoyant densities (mice), 274
hyperthyroidism and, 117
regulation of epididymal protein secretion (rodent), 266
simultaneous proliferation and differentiation of mast cells and Leydig cells (rat), 387
steroidogenesis
in arthritis, macrophage-derived secretory products in (rat), 87
caudal elevation and (rat), 224
cytokines and (mice), 437
genetic mutations and (mice), 312
Testosterone
circulating level, in cardiomyopathic hamster, 422
differential regulation in release of bioactive vs. immunoactive gonadotropins from cultured pituitary cells (rat), 526
plasma levels
changes after kidney transplantation and cyclosporine therapy, 332
dose-response effects of GnRH (horse), 543
production
in arthritis (rat), 87
cytokines and (mice), 437
heterogeneity of Leydig cells with different buoyant densities (mice), 274
regulation of Leydig cell 3β-hydroxysteroid dehydrogenase-isomerase activity (mice), 93
serum level
caudal elevation and (rat), 224
hyperthyroidism and, 117
ketoconazole and (rodents), 191
spermatogenesis and, androgen-regulated proteins (rat), 172
Toxicology, computer tracking of germ cells in cycle of seminiferous epithelium, 185
Transferrin, Sertoli cell production in vitro, 361
Triton X-100, effect on acrosin recovery in clinical assay, 571
Tumor necrosis factor-α
Leydig cell steroidogenesis and (mice), 437
sperm motility in vitro and, 249

U

Ultrastructure. *See* Electron microscopy; Light microscopy
Urogenital tract, development in male, mesenchymal-epithelial interactions, 465
Uterine fluid, sperm motion initiation factors in (rat), 444

V

Vitronectin, sperm surface, expression following capacitation, 488

W

Water permeability, spermatozoa (bull/fowl), 131
Weightlessness. *See* Microgravity
Western blot analysis, Sertoli cell plasma membrane polypeptides in spermatogenic cell-Sertoli cell adhesion (rat), 160
